12. November 19	Ealon Joelson MD	Neurology
13. November 26	Thanksgiving	
14. December 3	Robert Goldsby MD	Pediatrics, Hematology, Oncology

Former CAL students, now successful health care professionals, return to Berkeley to provide lectures on how they prepared for their profession, their daily professional life, and what they value most about their present lives. Their lectures are given at noon on Fridays during the Fall semester in 10 Evans Hall. (Right after IB 131 lectures on Friday.) You write down the two most important items you learned from each of the 13 lectures and turn in these 26 comments for your final P or NP grade.
