0830 **Trevor Allen** "The effects of climate change on the embryonic development of the nudibranch *Stylocheilus striatus*

0845 **Neetha Iyer** "Effects of background adaptation and food availability on habitat preference of the network pipefish, *Corythoichthys flavofasciatus*"

0900 **Vanessa Wormser** "Intertidal zonation of two gastropods, *Nerita plicata* and *Morula granulata* in Moorea, French Polynesia"

0915 **Rachel Horn** "The effects of *Litopenaeus stylirostris* aquaculture on macroalgae in Opunohu Bay, Moorea, French Polynesia"

0930 **Amelia Weiss** "Sea urchin biomechanics: surviving heavy flow conditions in Moorea, French Polynesia"

0945 **Elaine West** "Adaptive regeneration of *Ophiocoma scolopendrina* under two feeding treatments in Moorea, French Polynesia"

1000-1030 **Break**

1030 **Vicki Hsieh** "Monitoring multiple organ evisceration and regeneration of sea cucumber *Holothuria leucospilota*"

1045 **Caroline Lewis** "The influence of current on the adhesive potential and density of the Magnificent Sea Anemone (*Heteractis magnifica*) in Moorea, French Polynesia"

1100 **Shannon Lance** "Pink pigmented lesions on massive *Porites* coral in Moorea: distribution and pathogenic factors"

1115 **Vickie Ly** "The association and diversification of *Trapezia* crabs with their obligate *Pocillopora* coral hosts in Moorea, French Polynesia"

1130 **Lesje Atkinson** "Associations between the hermit crab *Dardanus pedunculatus* and its commensal sea anemone *Calliactis tricolor* on Moorea, French Polynesia"
1145-1330 **Lunch Break** [and time to show movie and pictures]

1330 **Carolina Mendez** "Zooplankton assemblage in Opunohu and Cooks Bays (Moorea, French Polynesia) and the response of copepods to changes in salinity"

1345 **Sergey Piterman** "The effects of a freshwater gradient on zooplankton and their distribution"

1400 **Jacqueline Hurley** "Recovery speed of *Cardisoma carnifex* after burrow disturbance"

1415 **Regina Mohan** "Aggressive behaviors within and between pairs of Common Myna (*Acridotheres tristis*)"

1430 **Jasper Wu** "The composition of bryophyte communities on limestone versus basalt substrates in coastal and mid-elevation forests of Moorea, French Polynesia"

1445-1515 **Break**

1515 **Stephanie Au** "Succession in galls on Malay Rose Apple and their impact on leaf aging"

1530 **Genoa Starrs** "Arthropod communities on decomposing fruit in agricultural and forested areas on Moorea, French Polynesia"

1545 **Hua Truong** "Coloration in the Spiny-Backed Spider, *Thelacantha brevispina* (Araneae, Araneidae) on Moorea, French Polynesia"

1600 **Daisy Gonzalez** ""Cannibalism and prey preference in the wolf spider *Hogna crispipes""

1615 **Mauna Dasari** "The biology, development, and host distribution of epifoliar fungi on the Mangrove Fern (*Acostrichum aureum*)"

1630 **Final Remarks by Professors and GSIs** (students please stay after for a brief meeting)

Professors: **Jonathon Stillman & Brent Mishler** (lead organizer, 2012), IB; **Vince Resh & George Roderick**, ESPM

GSIs: **Matthew Luskin** (ESPM), **Rosemary Romero** (IB), **Darcy Kato Ernst** (IB)
